

## Sun Ancon total Enzymes

### Enzymes

Enzymes regulate the normal processes of digestion, absorption, detoxification, blood circulation, balance our body PH and waste removal all essential to the very functions that makes human life possible. Enzymes are not only the foundation of human life, they are fundamental the HEALTH! And maintain our body function.

### Property of Enzymes

Enzymes are very important molecules in biology. Enzymes are catalytic proteins that help to speed up chemical reactions in the body and bind temporarily to one or more of the reactants of the reaction they catalyze. They are very specific in their functions. Each enzyme has only one reaction that it can help. Without enzymes, may of the important processes of life could not happen. Enzymes are not changed when they perform their function.

## How enzymes work?

This is the simplest model to represent how an enzyme works. The substrate simply fits into the active site to form a reaction intermediate.

Enzymes have an **active site**. This is part of the molecule that has just the right shape and functional groups to bind to one of the reacting molecules. The reacting molecule that binds to the enzyme is called the **substrate**. So the enzyme is used to form a reaction intermediate, but when this reacts with another reactant the enzyme reforms.

## **Enzymes Helps To:**

### **1. Regulate Internal Functions:**

- Enzymes buffer internal acidity
- maintain the proper balance of beneficial bacteria in the body
- aid digestion
- strengthen resistance to harmful bacteria
- They serve to maintain and enhance internal functions
- help restore you to a state of living more complete rather than living with just mediocre health.

### **2. Purify the Blood:**

- Enzymes are able to help remove unwanted substances from the blood
- dissolve cholesterol attached to artery walls
- prevent cardiovascular diseases caused by high blood pressure

### **3. Infection Fighter:**

- When good cells are damaged and germs attack, enzymes in the body rally to counter and fend off the bacteria.They then break down and remove the festering grem and alleviate the infection of the afflicted area. At the same time, nutrients in your body are induced to generate new cells and bring about full recovery.

### **4. Bactericide:**

- Enzyme has anti-bacterial properties themselves.

### **5. Improve Digestion and Absorption:**

- Enzymes are able to metabolize nutrients thus making them more easily digested, absorbed, and oxidized and so produce the needed energy and heat.
- help to maintain hormonal balance.

## **They also help in cases of:**

### **1. Overeating**

- cleanses the stomach

### **2. Intoxication**

- quickly breaks down the blood alcohol
- preventing inebriation or helping the recovery process after intoxication

### **3. Poor gastrointestinal function**

- blocking the growth of the germs that cause putrefaction in the intestines
- promoting the proliferation of lactic acid bacteria and other beneficial Bacteria, aiding gastrointestinal absorption

### **4. Postoperative recuperation**

- aids food digestion and conversion into products more easily absorbed. Especially beneficial in the recovery of patients with gastric and duodenal ulcers and ulcers of the large intestine and constipation and hemorrhoids amazing results in treating such diseases has been demonstrated.

### **5. Improve Metabolic Cell Function**

- Human body cells have metabolic functions, Old cells must be replaced by new ones every four months. Only when the enzymes in the body are in good balance is this process and the chemical functions completed with a smooth transition between cell decomposition and restoration. If the enzymes don't work properly, disease may result.

### **6. Beauty**

- Promotes smooth, fine-textured, beautiful skin
- Removes freckles, black spots and prevents early wrinkling
- Removes rashes, and is good for skin allergies and hives.
- Clears red eyes and is effective in promoting clearer vision.
- Nourishes and promotes hair and nail growth.

## 7. Health Care

- Promotes long life through normal cell metabolism
- Help to re-activate cells to prevent diseases
- Effective in fighting cancers and also for the prevention of infections associated with AIDS.
- Achieving Pregnancy
- The sperm enzymes break down the wall surrounding the ovum enabling the tow to combine and generate new life.
- Ingredients for Total Enzyme Drink

### Sun Ancon total Enzymes Granule

- Total Enzyme extracts from 86 kinds of Vegetables and fruits.
- including all kinds of enzymes for our body needs such as

**Amylase** Glycogen → Glucose

**Protase** Protein → Amino acid

**Lipase** Lipid → Fatty acid

**Fibrinase** Fibrin → Cellulose

- Composed of various vitamins (A, B, C, D) and nutrition elements

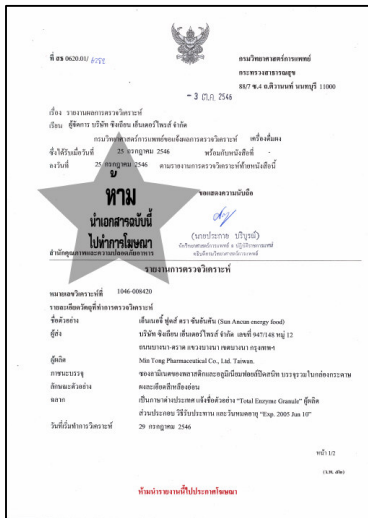

## The instruction

1. Please eat enzymes after your meals. To control your weight, eat it before your meals.
2. Melt it in your mouth and drink some water afterwards. In addition, it could be mix with cold water, milk or juice for better taste but be careful not more than 60 C° because enzyme will be destroyed.
3. Use it 3 meals a day, each meal takes 1-2 packs. For the first month, you should use it 3 packs per meal so that we can remove residue.

- Min Tong Pharmaceutical Co., Ltd.
- No. 99-669296-00
- G.M.P. world standard Quality

## **Enzyme Deficiency Symptoms**

Are you sure you have enough digestive enzymes? Check the enzyme deficiency list below for important information.

### [Amylase Deficiency](#)

- Skin Rashes
- Hypoglycemia and Mood Swings
- Depression and Fatigue
- Allergies and Sinus Issues
- PMS and Hot Flashes
- Poor Circulation Causing Cold Hands and Feet
- Neck and Shoulder Aches
- Inflammation in the Body

### [Protease Deficiency](#)

- Weakness in the Back
- Fungal Irritations
- [Constipation](#)

### [Lipase Deficiency](#)

- Acne
- Gall Bladder Stress and Gallstones
- Hay Fever
- Aching Feet
- Arthritis
- Bladder Problems
- Cystitis and Prostate Problems

### [Prostate Cancer and Enzymes](#)

- Psoriasis
- Urinary Weakness
- Constipation
- Diarrhea
- Heart Problems

### **Combination Deficiency**

- Chronic Allergies
- Common colds
- Diverticulitis
- Irritable Bowel
- Chronic Fatigue
- Sinus Infection
- Immune Depressed Conditions

## Learn About the Importance of Enzymes

You can improve your [health](#) with beneficial digestive enzymes, supplements that improve your digestion and the assimilation of nutrients through your body's digestive system.

Learn about some of the best enzyme supplements and how they can improve your health. The benefits of [enzymes](#) provide support for the body on many different levels.

Scientists thought that carbohydrate, protein and fat are the three nutritive substances in dietetics which are necessary to live. However, carbohydrate alone is not enough for proper metabolism. They then added vitamin and mineral to make up five nutritive substances. But then again, minerals were not digested. So, they added an overlooked substance, food fiber as the sixth nutritive substance.

Other than these six nutritive substances there was one very important thing to keep life alive. It is the **enzyme**.

What kind of food contains more enzymes? RAW fishes, meats, vegetables, fruits and specially fermented foods contains great amount of enzymes. Fermented foods have more enzymes called vegetable enzyme.

Enzyme weakens when it's heated. This is the reason why we are causing virtually all of our own disorders and diseases every time we eat a cooked or processed food. When we eat cooked or processed foods we're eating dead or denatured foods. Dead foods have no living enzymes and most nutrients are diminished significantly. Therefore, you should practice eating raw foods which contains enzyme.

Researchers found that the younger people had 30 times more amylase in their saliva than the older people. that lack of enzymes in the body, makes the blood dirty, and it is the base of many kinds of diseases.

### **Humbart Santillo**

Food Enzymes is a practical and concise guide that explains why food enzymes are so important, how correct enzyme supplementation is beneficial, and how food enzymes function. It also presents research on why we need food enzymes and which food enzymes are necessary for a person's particular needs. The information in Mr. Santillo's book is breakthrough in the field of nutrition and health care.

Did you know that the body could do nothing without enzymes? All metabolic functions require the help of these "biological units of work." Enzyme levels, particularly in our immune system, are severely depleted due to the over consumption of processed and cooked foods, and the toll that stress, environmental pollutants, and other life-negative factors have on our lives. If you are interested in longevity, vitality, superior health, overcoming sickness, or losing weight, enzyme can help you.
